

## Supply Chain Results Delivery

### Delivering Supply Chain Results

*“MetaChain played an important part in working with Cargill to implement our Supply Chain solution. The MetaChain consultants provided a blend of supply chain processes and technical knowledge to meet our business requirements.”*

*Cheryl Fischer  
Planning Application  
Manager  
Cargill Foods*

*“In order to receive additional Supply Chain benefits within an aggressive timeline, it was very critical to Coca-Cola FEMSA that an experienced consulting team work together with us. MetaChain’s expansive APS product expertise, their Supply Chain knowledge, and commitment to succeed have been critical contributors to our achievements so far.”*

*Hector Calva  
Mfg. And Logistics Mgr.  
Coca-Cola FEMSA*

MetaChain focuses on helping our clients achieve financial and customer service results through our Supply Chain Results Delivery practice. The practice is based on three critical levers:

- Operational Improvement — impacting the supply chain by focusing operations, processes, and people on supply chain results.
- Software Implementation — leveraging our experience with supply chain software to provide our clients with cutting edge, results focused software implementations.
- Performance Measurement — providing solutions to guide and measure the effectiveness of an organization’s supply chain operations and investments.

Some examples of our service offerings in these areas include:

Operational Improvement	APS Implementations	Performance Measurement
Management Consulting	APS Implementation Consulting	Business Intelligence
Supply Chain Assessments	OneWorld Implementation Consulting	Supply Chain Performance Measurement
Operational Studies and Recommendations	OneWorld / World Integration	Exception reporting and Visibility
Process Reengineering	Supply Chain Project Management	
ROI Studies	APS Training	
Supply Chain Financial Analysis	Post Implementation Auditing	
	Supplier / Customer Connectivity	

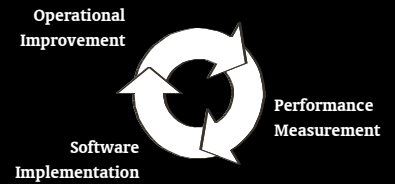

Many companies have multiple supply chain improvement efforts in progress. Alignment of these efforts is critical to avoid unmanageable processes, systems that are implemented in a vacuum, and results that go undelivered and unmeasured. MetaChain understands how to align and link these investments and is able to help our clients structure coordinated results delivery cycles that minimize risk and provide results across the supply chain.

### What kind of results can we expect with MetaChain?

At MetaChain, we expect our team and our clients to deliver results. Some sample deliverables include:

- 20 % reduction of finished goods inventory through differentiated stocking and service policies
- New planning system operational in 2.5 months and maintaining high service levels with sharply reduced inventory.
- The performance measurement tool was put in place within 4 weeks. The tool highlights problem areas and provides impetus for operational change.

## Supply Chain Results Delivery

### Delivering Supply Chain Results

*Our staff of supply chain management consultants have worked throughout the industry helping organizations move towards their supply chain goals. Our experience is rooted in years of work as industry consultants and as supply chain practitioners.*

### Why MetaChain?

#### Focus on Supply Chain Results

MetaChain's services improve the bottom line and increase shareholder value by helping you align your supply chain to deliver financial and customer service results. We can also help unlock the value promised by some of your past projects, while structuring future projects to deliver value from the start.

#### Integrated Approach

Operational Improvement, Software Implementation, and Performance Measurement all need to work together in order to achieve the best supply chain results. MetaChain is uniquely positioned to help deliver these results. For example, our team's experience in financial analysis helps to quantify the size of the opportunity and to set the targets for performance measurement. Our team's capabilities to align operational improvements and technology allow us to conceptualize and design solutions that may use software and / or process changes to improve supply chain efficiency. MetaChain's results focused approach, the interdisciplinary experience of our team, and our integrated methodology allow supply chain alignment to be planned and executed right from the start.

#### Deliver and Sustain

The first step in the MetaChain Supply Chain Results Delivery cycle is typically the Supply Chain Analysis (SCA). It is in the SCA where initial recommendations are made. After making initial recommendation, the MetaChain team rolls up its sleeves and continues working with you through the process of implementation and go-live. We measure our success when we help you improve customer satisfaction and deliver the results to your bottom line. MetaChain also believes that the right knowledge transfer and change management is critical to ensure that the results are sustained long after we leave.

#### Proven Experience

MetaChain brings a unique combination of supply chain experience in operations, software, and performance measurement. This experience has been tested and proven at global Fortune 500 companies as well as at growing mid-market enterprises. We have designed and implemented solutions for clients in a diverse range of industries including consumer products, pulp and paper, oil and gas, and health-care. MetaChain has the strongest references in the industry. Most importantly, our clients trust us and continue to build on our mutual partnerships.
